PERSONAL PROJECTS

Biometric Voting System (01/2019 - 03/2019)
- In biometric Voting System paper we have used thumb impression for the purpose of voter identification .As the thumb impression of every individual is unique it helps in maximizing the accuracy. A database is created containing the thumb impression of all voters in the constituency. illegal voters and repetition of votes is checked for in this system. Hence of this system is employed the elections would be fair and free from rigging

Hotel Management System (11/2021 - 12/2021)
- This project aims at creating on Hotel Management System which can be used by Admin and Customers. The admin to advise/publish the availability of rooms in different hotels and customers are checking the availability of room in required hotel. Customers should be able to know the availability of the rooms on a particular date to reserve in hotel. They should be able to reserve the available rooms according to their need in advance to make their stay comfortable. The Admin hands the booking information of customers. The users can register and log into the system. The administrator will know the details of reservation and daily income. The hotel department maintain the seat availability and booking details in certain database.
